What about the site?

ÁVILA, Spain

Ávila is a medieval city in the province of Castilla y León in western Spain. Founded in the 11th century to protect the Spanish territories from the Moors, Ávila has a magnificently well-preserved city wall, a historic cathedral, a number of Romanesque churches, and an authentic medieval atmosphere. For all these reasons, the entire Old Town of Ávila has been designated a World Heritage Site by UNESCO. For pilgrims, the

city of Ávila is important because of its association with the great mystic and reformer St. Teresa de Jesus, better known as **St. Teresa of Ávila**. Teresa was a 16th-century Carmelite nun who reformed her order, had many ecstatic visions, and wrote several books. She is the female patron saint of Spain and was the first woman to be named a Doctor of the Church.

Its climate is Mediterranean with warm summers and quite cold winters with snowfalls. The hottest month, July, has an average temperature of 21 °C and the coldest month, January, has an average of 3 °C. Annual rainfall is low compared to surrounding areas. The Adaja is dry for several months of the year and the town has historically had water supply problems. For more information about the weather forecast go to the following web page : <http://www.aemet.es/en/eltiempo/prediccion/municipios/avila-id05019> .

The first public festival after the winter cold is the Holy week. The temperature is cold, especially at night, so one should not forget warm clothes

Ávila holidays are October 15, Santa Teresa de Jesús, and May 2, San Segundo. The festivities take place around October 15 and the Summer Festival in mid-July.

Once your plane has landed in Adolfo Suarez Airport in Madrid you need to get to the train station called **Chamartin**. It is necessary to consider in which of the four terminals you have arrived: T1, T2, T3 or T4.
